Sea-Doo Utopia 205 Acceleration is just insane in this 430 hp rocket. The boat was so quick in our tests it was difficult to measure on the stopwatch while it pushed us firmly back in the Utopia's well-upholstered seats. It was so much fun, we couldn't stop pressing the throttle forward again and again.

This succinct, interdisciplinary introduction to critical reasoning successfully dares students to question their own assumptions and to enlarge their thinking world through the analysis of the most common problems associated with everyday reasoning. The text offers a unique and effective organization: Part I explains the fundamental concepts; Part II describes the most common barriers to critical thinking; Part III offers strategies for overcoming those barriers; Part IV offers a selection of contemporary issues that invite students to practice their skills.

Do you know what "quatrefoil" and "impolitic" mean? What about "halcyon" or "narcolepsy"? This book is a handy, easy-to-read reference guide to the proper parlance for any situation. In this book you will find: Words You Absolutely Should Know (covert, exonerate, perimeter); Words You Should Know But Probably Don't (dour, incendiary, scintilla); Words Most People Don't Know (schlimazel, thaumaturgy, epergne); Words You Should Know to Sound Overeducated (ad infinitum, nugatory, garrulity); Words You Probably Shouldn't Know (priapic, damnatory, labia majora); and more. Whether writing an essay, studying for a test, or trying to impress friends, family, and fellow cocktail party guests with their prolixity, you will achieve magniloquence, ebullience, and flights of rhetorical brilliance.

The South Asian subcontinent is home to nearly a billion people and has been the site of fierce historical contestation. It is a panoply of languages and religions with a rich and complex history and culture. Drawing on the newest and most sophisticated historical research and scholarship in the field, *Modern South Asia* is written in an accessible style for all those with an intellectual curiosity about the region. After sketching the pre-modern history of the subcontinent, the book concentrates on the last three centuries from c.1700 to the present. Jointly written by two leading Indian and Pakistani historians, it offers a rare depth of historical understanding of the politics, cultures and economies that shape the lives of more than a fifth of humanity. In this comprehensive study, the authors debate and challenge the striking developments in contemporary South Asian history and historical writing. The book provides new insights into the structure and ideology of the British raj, the meaning of subaltern resistance, the

refashioning of social relations along lines of caste, class, community and gender, the different strands of anti-colonial nationalism and the dynamics of decolonization. This book is a work of synthesis and interpretation covering the entire spectrum of modern South Asian history - social, economic and political. The authors offer an understanding of this strategically and economically vital part of the world.

The book investigates the diagnostics for the prosodic word in European Portuguese, the prosodic organization of various sorts of morphosyntactic objects, and the definition of the prosodic word domain. The book bears on the organization of grammar and phonology, its interface with morphology and syntax, and the nature of phonological representations. Besides focusing primarily on European Portuguese, it also refers to languages such as Italian, Dutch, German, and English, among many others.

Ghosts and other supernatural phenomena are widely represented throughout modern culture. They can be found in any number of entertainment, commercial, and other contexts, but popular media or commodified representations of ghosts can be quite different from the beliefs people hold about them, based on tradition or direct experience. Personal belief and cultural tradition on the one hand, and popular and commercial representation on the other, nevertheless continually feed each other. They frequently share space in how people think about the supernatural. In *Haunting Experiences*, three well-known folklorists seek to broaden the discussion of ghost lore by examining it from a variety of angles in various modern contexts. Diane E. Goldstein, Sylvia Ann Grider, and Jeannie Banks Thomas take ghosts seriously, as they draw on contemporary scholarship that emphasizes both the basis of belief in experience (rather than mere fantasy) and the usefulness of ghost stories. They look closely at the narrative role of such lore in matters such as socialization and gender. And they unravel the complex mix of mass media, commodification, and popular culture that today puts old spirits into new contexts.

'Peter Lamborn Wilson shows why we cherish pirates - and why, for the sake of the future, we must continue to do so. Interesting and compelling...a rollicking, adventurous book.' Marcus Rediker, author, *Between the Devil and the Deep Blue Sea*' A chronicler, a historiographer, and a piratologist in the tradition of Defoe...with immense learning and interesting sympathies. His scholarship cuts through the seas of ignorance and prejudice with grace and power.' Peter Linebaugh, author, *The London Hanged*' One of those rare books which give historians new ideas to think about. It deals with 17th century European converts to Islam - usually but not always as pirates - whose numbers Wilson puts at thousands. His careful analysis of (the) renegadoes, their ideas, and political practice leads to a very tentative suggestion that some of them may have links with Rosicrucianism and the 18th-century Enlightenment...Historians will have to think about this book's novel theme and pursue its implications. Wilson really does turn the world upside down!' Christopher Hill, author, *The World Turned Upside Down*' From the 16th to the 19th centuries, Muslim corsairs from the Barbary Coast ravaged European shipping and enslaved thousands of unlucky captives. During this same period, thousands more Europeans converted to Islam and joined the pirate holy war. Were these men (and women) the scum of the seas, apostates, traitors -- Renegadoes? Or did they abandon and betray Christendom as a praxis of social resistance? Peter Lamborn Wilson focuses on the corsairs' most impressive accomplishment, the independent Pirate Republic of Salé, in Morocco, in the 17th century. Corsairs, Sufis, pederasts, "irresistible" Moorish women, slaves, adventures, Irish rebels, heretical Jews, British spies, a Moorish pirate in old New York, and radical working-class heroes all populate a book which intends to entertain and to make a point about insurrectionary communities.
