For SAS programmers or analysts who need to generalize their programs or improve programming efficiency, Art Carpenter thoroughly updates his highly successful second edition of Carpenter's Complete Guide to the SAS Macro Language with an extensive collection of new macro language techniques and examples. Addressing the composition and operation of the SAS macro facility and the SAS macro language, this third edition offers nearly 400 ready-to-use macros, macro functions, and macro tools that enable you to convert SAS code to macros, define macro variables, and more! Users with a basic understanding of Base SAS who are new to the SAS macro language will find more detail, utilities, and references to additional learning opportunities; advanced macro language programmers who need help with data-driven macros and dynamic application development will find greatly expanded treatment of these topics. This revised and enlarged edition includes the following topics: New and expanded introduction to the macro language Functions, automatic macro variables, and macro statements new to the macro language Expanded macro language tools that interface with the operating system Expanded data-driven methodologies used to build dynamic applications Expanded discussion of list processing, with four alternative approaches presented Additional file and data management examples Expanded discussion of CALL EXECUTE and DOSUBL New discussion of using the macro language on remote servers Expanded discussion and examples of macro quoting Far beyond a reference manual issued from an " ivory tower, " this book is pragmatic and example-driven. Yes, you will find syntax examples; yes, the code is explained. But the focus of this book is on actual code used to solve real-world business problems. In fact, an entire appendix is dedicated to listing the nearly 70 classes of problems that are solved by programs covered in this edition. Discussion of the examples elucidates the pros and cons of the particular solution and often suggests alternative approaches. Therefore, this book provides you both a compendium of reusable and adaptable code, and opportunities for deepening your understanding and growing as a SAS programmer.

This publication is a derived version of the International Classification of Functioning, Disability and Health (ICF, WHO, 2001) designed to record characteristics of the developing child and the influence of environments surrounding the child. This derived version of the ICF can be used by providers, consumers and all those concerned with the health, education, and well being of children and youth. It provides a common and universal language for clinical, public health, and research applications to facilitate the documentation and measurement of health and disability in child and youth populations.—Publisher's description.

Maximize the impact and precision of your message! Now in its fourth edition, the Microsoft Manual of Style provides essential guidance to content creators, journalists, technical writers, editors, and everyone else who writes about computer technology. Direct from the Editorial Style Board at Microsoft—you get a comprehensive glossary of both general technology terms and those specific to Microsoft; clear, concise usage and style guidelines with helpful examples and alternatives; guidance on grammar, tone, and voice; and best practices for writing content for the web, optimizing for accessibility, and communicating to a worldwide audience. Fully updated and optimized for ease of use, the Microsoft Manual of Style is designed to help you communicate clearly, consistently, and accurately about technical topics—across a range of audiences and media.

This practical resource introduces electrical and electronic principles and technology covering theory through detailed examples, enabling students to develop a sound understanding of the knowledge required by technicians in fields such as electrical engineering, electronics and telecommunications. No previous background in engineering is assumed, making this an ideal text for vocational courses at Levels 2 and 3, foundation degrees and introductory courses for undergraduates.

Getting probed by aliens was only the beginning... I was abducted by incompetent aliens. They didn't know what they were doing and they still don't have a clue. Now that we're done with all the probing, they're taking lessons in 'Caring for Vulnerable Females' and 'Nest Building for Beginners' and want to turn me into their mate. And no, they don't listen when I tell them I don't need a nest. In theory, I could fall for these three hunky aliens who can bring me more pleasure than I ever dreamed of, but we're being watched and analysed every minute of the day. A creepy professor from the Intergalactic University uses us as examples for her lessons, sometimes with dangerous consequences, and there's nothing we can do about it. I don't want to be a science experiment, but can I resist falling for the aliens who stole me from Earth? The first part of this hilarious sci-fi romance trilogy is published in the Stolen and Seduced anthology, but all three books can be read as standalones. If you want sexy aliens who will protect their mate at all cost, a sassy female who doesn't need protecting, plus every single alien abduction trope imaginable, scroll up and read this book today. Beware, you may be abducted at any moment, so don't waste time.

The award-winning author of Sweet Clara and the Freedom Quilt presents a 100th anniversary tribute to the Titanic tragedy based on the words and stories of its witnesses and survivors, in a dramatic account that is complemented by archival photographs.
