Centering Theory (WALKER, JOSHI ET AL. 1998) is a theory of local coherence in which four types of transitions are used as parameters of coherence.

Centering Theory in Discourse | Request PDF
This edited collection of previously unpublished papers focuses on Centering Theory, which has been developed in the context of computational linguistics and cognitive science. It concerns the principles by which sentences in a discourse are linked to one another.

Centering Theory in Discourse - Joshi Prince Walker ...
Centering is a model of the conversants' center of attention in discourse that is concerned with the relationship of attentional state, inferential complexity and the form of referring expressions.

Centering in Naturally-Occurring Discourse: An Overview
Centering theory, developed within compututionol linguistics, provides an account of ways in which patterns of interutteronce reference con promote the local coherence of discourse. It states thot each utterance in o coherent discourse

Pronouns, Names, and the Centering of Attention in Discourse
Our discourse segment parser is inspired by Center-ing theoryGrosz et al.(1995). We modify Center-ing theory to approximate it in a neural model. The theory considers entities as candidates of centers. To determine centers at the phrase level or the en-tity level, we would need to incorporate an external

Centering-based Neural Coherence Modeling with ...
Centering fits within the theory of discourse structure developed by Grosz and Sidner (1986), henceforth, G&S. G&S distinguish among three components of discourse structure: a lin-guistic structure, an intentional structure, and an attentional state. At the level of linguistic
