This book takes an extensive look at the many different types of users and cultures that comprise the popular social media platform Tumblr. Though it does not receive nearly as much attention as other social media such as Twitter or Facebook, Tumblr and its users have been hugely influential in creating and shifting popular culture, especially progressive youth culture, with the New York Times referring to 2014 as the dawning of the “age of Tumblr activism.” Perfect for those unfamiliar with the platform as well as those who grew up on it, this volume contains essays and artwork that span many different topics: fandom; platform structure and design; race, gender and sexuality, including queer and trans identities; aesthetics; disability and mental health; and social media privacy and ethics. An entire generation of young people that is now beginning to influence mass culture and politics came of age on Tumblr, and this volume is an indispensable guide to the many ways this platform works.

This volume invites scholars of the Catholic and Protestant Reformations to incorporate recent advances in transnational and transregional history into their own field of research, as it seeks to unravel how cross-border movements shaped reformations in early modern Europe. Covering a geographical space that ranges from Scandinavia to Spain and from England to Hungary, the chapters in this volume apply a transregional perspective to a vast array of topics, such as the history of theological discussion, knowledge transfer, pastoral care, visual allegory, ecclesiastical organization, confessional relations, religious exile, and university politics. The volume starts by showing in a first part how transfer and exchange beyond territorial circumscriptions or proto-national identifications shaped many sixteenth-century reformations. The second part of this volume is devoted to the acceleration of cultural transfer that resulted from the newly-invented printing press, by translation as well as transmission of texts and images. The third and final part of this volume examines the importance of mobility and migration in causing transregional reformations. Focusing on the process of ‘crossing borders’ in peripheries and borderlands, all chapters contribute to the de-centering of religious reform in early modern Europe. Rather than princes and urban governments steering religion, the early modern reformations emerge as events shaped by authors and translators, publishers and booksellers, students and professors, exiles and refugees, and clergy and (female) members of religious orders crossing borders in Europe, a continent composed of fractured states and regions.
