Designed to provide students with a
foundation in understanding and interpreting
histologic and cytologic preparations, Color
Atlas of Veterinary Histology is a practical
benchside reference focusing on the normal
histology of eight common domestic species.
This Third Edition has been revised with new
images, information, and updated terminology

Acces PDF Color Atlas Of Veterinary Anatomy Volume 3 The Dog And Cat Dog

throughout. Introductory chapters have also been expanded to offer more complete coverage of the basic types of tissues, providing an even more thorough grounding in the principles of histology. For the first time, the more than 900 photomicrographs are available digitally in an interactive atlas on CD, offering images available for download with zoom capability. The new edition of this veterinary-specific histology atlas provides veterinary and veterinary technician students with an essential pictorial resource for interpreting histologic preparations.

Extraordinary accuracy and beautiful original artwork are just two features readers will find in this new resource, providing a basic foundation in domestic large animal anatomy. Its unique organization includes the anatomy of all organ systems in the various species, described in a consistent manner. The book presents relevant anatomy of the following species: * Horse (with contributors by Dr. Gayle Trotter) * Ox (with contributions by Dr. Fran Garry) * Sheep and goat (with contributions by Dr. Joan Bowen) * Llama and alpaca (with contributions by Dr. LaRue Johnson) * Swine (with contributions by Dr.

Acces PDF Color Atlas Of Veterinary Anatomy Volume 3 The Dog And Cat Dog

LaRue Johnson) * and chicken (with contributions by Dr. John Avens). Features that enhance understanding: * Carefully selected labeling helps students learn and remember structures and relationships. * Male and female of a given species are depicted on facing pages so that topographic anatomy is easy to compare. * Structures common to various animals are labeled several times, whereas unique structures are labeled only on one or two species so students can make rapid distinctions of the structures peculiar to certain animals. * An introduction provides readers with a background in

Acces PDF Color Atlas Of Veterinary Anatomy Volume 3 The Dog And Cat Dog

nomenclature and anatomic orientation so they can benefit from the atlas even if they lack training in anatomy. The Atlas depicts topographic relationships of major organs in a simple, yet technically accurate presentation that's free of extraneous detail so that those using the atlas can concentrate on the essential aspects of anatomy.

The Color Atlas of Veterinary Anatomy volume 1 presents a unique photographic record of dissections showing the topographical anatomy of the ruminant. With this book you will be able to see the position and relationships of

Acces PDF Color Atlas Of Veterinary Anatomy Volume 3 The Dog And Cat Dog

the bones, muscles, nerves, blood vessels and viscera that go to make up each region of the body and each organ system. Each book in this three volume series is packed with full-color photographs and drawings of dissections prepared specifically for these texts.

Accessibly and systematically structured with each chapter devoted to a specific body region. Important features of regional and topographical anatomy presented using full-color photos of detailed dissections.

Detailed color line drawings clarify the relationships of relevant structures.

Presents anatomy in a clinical context.

Acces PDF Color Atlas Of Veterinary Anatomy Volume 3 The Dog And Cat Dog

Accompanying website with interactive quizzes and the chance to test yourself with self-assessment questions. New chapter on radiological anatomy. Special notes highlight clinical significance of each section.

This new resource provides a basic foundation in small animal anatomy for students of veterinary medicine, animal science, and veterinary technology. Extraordinary accuracy and beautiful original artwork make this a truly unique learning tool that includes the anatomy of all organ systems in the dog, cat, rabbit, rat, and guinea pig -
