(PDF) Computer Networking: A Survey

OCN (インターネット), or Open Computer Network (オープンコンピュータネットワーク: Ōpun Konpyūta nettowāku), is the largest Japanese Internet service provider, with over 7 million subscribers. It is owned by NTT Communications Corp, one of the largest telecommunication companies in the world. It offers dial-up and ISDN, DSL up to 50 Mbit/s and fiber up to 200 Mbit/s download and 100Mbit/s upload.

Open Computer Network - Wikipedia

Open source, open standards, and open protocols are all important to software defined networking. Since networking is, by definition, an activity which connects related system, it is important that standards exist to manage this communication. In traditional networking infrastructure, much of the control of network traffic is done by proprietary hardware solutions running proprietary software, or a mix of proprietary and open source software, on top of them.
