Concept maps are excellent, meaningful vehicles for learners to organize and visualize ideas or concepts and hierarchical relationships among them (requirements 1 and 2 above). They help learners clarify their thinking and organize and prioritize new information (Novak, 2010). In this article, we present in summary form a concept map (comprising three figures) that shows the central concepts of evolutionary biology and their relationships to one another in an organized, relevant knowledge ...

[Darwin concept map by Aidan McNaughton](#)

Concept maps are a visual illustration of concepts and ideas as a complex structure comprised of boxes or circles that are connected with linking words or phrases arranged around a central concept. Usually structured in a hierarchical relationship, the boxes and circles represent topics and sub-topics that are connected with descriptive expressions in order to define better the mutual relationships.
