Diagnostic imaging is an important aspect of an Emergency Department patient workup. Given the high cost of imaging and the potential of patient harm (e.g. radiation dose, contrast reactions), it is essential that imaging be used judiciously. Read about Guidelines on Diagnostic Imaging on the Australasian College for Emergency Medicine website.

Guidelines on diagnostic imaging in the Emergency
Diagnostic Imaging. Deciding to Image . . . MSK Ultrasound is generally not of great use in the Emergency Department UNLESS you are suspicious of a quadriceps / patellar tendon injury with ambiguous other objective findings. MSK Ultrasound cannot adequately image the menisci or cruciate ligaments, and while they can visualise the collateral . . .

Diagnostic Imaging for the Emergency Physician: Expert
Abstract. Objective:To assess emergency department (ED) doctors' knowledge of radiation doses associated with diagnostic imaging and to describe their practice with regard to informing patients of risk. Design, participants and setting:Prospective, questionnaire-based observational study in May 2009 among all 110 doctors in the EDs of a 570-bed teaching hospital and a 200-bed district hospital.

Doctors' knowledge of patient radiation exposure from
This is why the Diagnostic Imaging department at Pulse Veterinary Specialists and Emergency offers the most state-of-the-art imaging equipment to help 'look inside' your pet, aiding in diagnosis of illness. Diagnostic Imaging is a subspecialty of veterinary medicine that focuses on using advanced imaging technologies, such as x-rays, ultrasound, and CT, for the diagnosis and management of complex cases.

Diagnostic Imaging—Pulse Emergency Veterinary—Edmonton
The Diagnostic Imaging department provides a 24 hour service for patients attending the Emergency Department and for those who are inpatients. Hours of work for other specialities within the X-Ray department vary so please enquire. The department provides diagnostic tests including plain film X-rays, mammography, ultrasound, CT and MRI scans.
