Section 2-7 :

Modeling with First
Order Differential
Equations. We now
move into one of the
main applications of
differential equations
both in this class and
in general. Modeling
is the process of
writing a differential
equation to describe a
physical situation.

Differential equations have wide applications in various engineering and science disciplines. In general, modeling of the variation of a physical quantity, such as temperature, pressure, displacement, velocity, stress, strain, current, voltage, or concentration of a pollutant, with the change of time o
