~~9. Unscrew (relax) the brackets on both rubber boots on both sides of the carb (see picture under step 6). This is so you can rotate the carb. Then rotate the carb with the top part to the left of the bike. Unscrew the two screws on top. Take the top off. Note there is a small O ring under that vacuum tube (don't lose!):~~

Along with the carb came the secondary filter and the bar mounted choke lever. Before starting the actual installation I decided that a quick peek at the instructions wouldn't be a bad thing. The first good tip was to remove the rear brake reservoir from the frame. This allowed me space to get my fingers in to finagle the new TM into place from the right side of the motorcycle. That extra room ...

Yes I think Moose makes one and there is another plastics company that makes one. Call Rocky Turner or similar catalog. I think it is around \$150.00. Take heed that you need metal tank to be street legal, although I know plenty of people with DR 650's that thump around on the street with plastic tanks without a problem. Posted on Nov 10, 2008

As a rough rule of thumb, modifying the stock carb unlocks about half the DR650's potential, a less restrictive exhaust does the rest. You can buy aftermarket jet kits and exhaust pipe for similar results, but if you like budget do-it-yourself mods try this BST magic as per the videos below. Part of the fun is grinding your own carb needle but don't stress about messing up this easy procedure ...
