The purpose of the fifth edition is to present future and experienced educators with an up-to-date understanding of contemporary perspectives on the assessment of children and youth, expanding previous coverage of both traditional and contemporary assessment approaches. Designed for assessors to acquire knowledge, understanding and skills related to the special education process, including referral for special education services, response to intervention, assessment timelines, eligibility requirements, monitoring, and evaluating student progress. The text also covers various approaches to assessing academic and behavioral concerns and the ability to compare and contrast specific approaches and implement them.

There are many assessment systems available to provide the answers teachers and parents seek regarding the progression of infants, toddlers, and young children. However, simply choosing and administering an assessment instrument or procedure from the wide array of tools available today can be an overwhelming task. Assessment of Young Children with Special Needs helps prepare teachers for the task of evaluating the skills of infants, toddlers, and preschool children with developmental delays and those considered at risk to...

What assessment tests are available to speech therapists? How are they best used? Originally published in 1993, *Assessment in Speech and Language Therapy* was designed to guide speech therapists in choosing the most appropriate assessments for evaluation, monitoring and intervention at the time. By providing guidance on defining the issues in assessment, it shows how to make sure that the process will produce a result relevant to the therapist's own needs and those of his or her clients. The major issues involved are discussed in detail, in particular how to make sure that assessments are relevant to individual needs. This title will be invaluable to all speech therapists and clinical psychologists working in this area.

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. Check with the seller prior to purchase. -- This title is only available as a loose-leaf version with Pearson eText. ; Revered expert authors Mary McLean, Mary Louise Hemmeter, and Patricia Snyder have written an indispensable text for the early childhood educator with Essential Elements for Assessing Infants and Preschoolers with Special Needs. Filled with the most vital information about the best evidence-based practices for use in assessment of young children with special needs, this elemental resource guides the development of its audience-future educators of the very young-preparing them with the necessary skills to successfully carry-out assessment of young children with disabilities, age birth through five. ; Carefully articulated and crafted in a clearly organized way, the twelve chapters that comprise this new entry to the field will provide its readers with the elements, the research, the application, and more. A strong overview and importance of assessment in EI/ECSE begins this practical new text, as assessment models and methods are presented, and assessing early learning environments is explored. Diversity, cultural competence, and assessment are key components to the text. The authors also address assessing language and communication, social competence and play skills, early academic skills, adaptive skills, motor skills, the functional assessment of challenging behaviors, and monitoring child progress. The text concludes with evidence-based practices in assessment. ; 0133399885 / 9780133399882 Essential Elements for Assessing Infants and Preschoolers with Special Needs, Loose-Leaf Version with Pearson eText -- Access Card Package consists of: ; 0132757079 / 9780132757072 Essential Elements for Assessing Infants and Preschoolers with Special Needs Loose Leaf Version 0133397963 / 9780133397963 Essential Elements for Assessing Infants and Preschoolers with Special Needs, Pearson eText -- Access Card ;

This text is ideal for upper level students in Special Education, School Psychology, and School Counseling. The text provides a comprehensive examination of testing and the assessment process for evaluation of children ages three through eighteen. The text is based on the assumption that when a child is referred for assessment, the goal is to solve the child's problem by developing appropriate academic or social interventions. The emphasis throughout is on functional assessment (i.e., assessment to help the child function better), not merely to classify; the focus is on what the child is expected to do (e.g., read, spell, etc.) versus what the child has (e.g., a learning disability). Goals are to describe how assessment data can be obtained and used by individuals engaged in the problem-solving process within educational settings and to integrate the assessment process typically used in schools with test instruments. Application has also been stressed through the frequent discussion of actual case-studies, examples, and special sections that show 'real'

Read Book Assessment Of Children With Special Needs

people dealing with 'real' problems. The revision has an expanded breadth of coverage so that age ranges and spectrum of disabilities are more thoroughly covered. The new, additional coverage of portfolio, performance and authentic assessment as related to children with exceptionalities gives students the specialized knowledge they need to use the best assessment tools in their own classrooms. The second edition features improved pedagogy to help students: new glossary of terms, boldfaced terms, more figures/graphics to enhance concepts, and an appendix listing major tests and publishers.

The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

Foundations of Assessment in Early Childhood Special Education gives pre-service and in-service early childhood and special education teachers the tools they need to best meet the needs of all children in their classrooms. Using a clear, accessible approach, the authors present the ideas in a way that is applicable both at home and in the classroom. A variety of formal and informal assessments are described, along with a number of practical skills for working effectively with all children. Real-life case studies help to explain the main ideas of each chapter, and a variety of web links plus current research help readers further explore the topics presented.

Note: This is the bound book only and does not include access to the Enhanced Pearson eText. To order the Enhanced Pearson eText packaged with a bound book, use ISBN 0134254600.
