Health administrators responsible for healthcare finance management decisions may be put in a position to question, for example, whether a drug needs to be prescribed or an imaging test needs to be done.

6 Ethical Issues in Healthcare in 2020 | AHU Online

The 4 cardinal principles of biomedical ethics-autonomy, beneficence, nonmaleficence, and justice-are widely accepted as standard ethical principles in medicine. 2 The conflict between autonomy and beneficence/nonmaleficence often leads to distress among health care professionals, as well as patients and their families, and frequently manifests in psychiatric consultations for evaluation of the patient's capacity to make medical decisions or to refuse recommended treatment.

Ethical Challenges In Medical Decision Making

The Jehovah's Witness religion is a Christian denomination with millions of members in more than 200 countries worldwide. Jehovah's Witnesses are well-known for their refusal to receive blood transfusions, which may lead to various challenges for medical practitioners involved in the treatment and management of Jehovah's Witness patients.

The challenges of treating Jehovah's witnesses

In order to consider as "ethical", medical practices must take into account four principles: autonomy, justice, beneficence, and non-maleficence. Additionally, autonomy requires that a patient has an autonomy of thought, intention, and action when making decisions about their health care procedures and that they must be free of coercion.

Medical Decision Making: Ethical Dilemmas and Challenges

If you are faced with an ethical dilemma, you can look to a number of medical bodies to help you find a solution, including the GMC and BMA. Justify the decision made Each situation is likely to be unique; for example, with an elderly confused patient, you will have to consider both a respect for their choice as well as their welfare.

Dealing with Ethical Issues in Medicine - Medical Revision

Prescribing decision-making for self-limiting infections can also be challenging for medical prescribers and there is wide variation in antibiotic prescribing . Antibiotic stewardship is a key public health concern worldwide (49); it is important that all prescribers follow best practice in this area yet there is ample evidence that this is not happening with potentially serious implications for the future (50 , 51).
