3 Methods of Excel Forecasts. By Conrad Carlberg. If you want to forecast the future in Excel – next quarter's sales, for example – you need to get a handle on what's happened in the past. So you always start with what's called a baseline (that is, past history – how many poppy seeds a company sold during each of the last ten years, where the market futures wound up each of the last 12 months, what the daily high temperature was year-to-date).
