companies and their investors want to ensure that any given project they plan on developing is actually “feasible”, and preparing a study showing this feasibility is the main point of writing such a report (which of course will help save needed capital and time in the long run).

Construction Feasibility Study - Prospectus

Feasibility Studies are usually required for large or contentious projects. The goal is to see if your construction or business plan is feasible by revealing the strong and weak points of a construction or business plan, assessing the practical aspects of the project. It is the act of defining associated problems and positive hopes or chances for a venture, as well as stating alternative options in the event of contention.
