South African scientists discover 2 fossils of prehistoric amphibians**Fossil Fish Found Alive Discovering**

To the museum curator who first studies it, it looks like an ancient fossil fish. But it can't be. The fossil fishes have all been extinct for eons... So begins the story of the coelacanth, a fish that survived the wave of extinction that killed the dinosaurs. From underwater quests for hidden populations to the dissection of the coelacanth's unique organs, this gripping scientific drama brings to life the thrill of discovery.

Enter *Kylinxia zhangi*, a shrimp-like creature preserved in fossils found in China's Yunnan province -- a discovery that researchers now say could be a key "missing link" in arthropod evolution.

Five-eyed fossil shrimp is evolutionary 'missing link' ...

Chinese scientists have discovered a creature resembling a shrimp that lived around 520 million years ago. The five-eyed creature may bring about some information on the evolution of Earth's most common animals. However, the evolution of common animals have remained unknown and a mystery, as all ...

Fossil Fish Found Alive: Discovering the Coelacanth.

Seventy million years ago, deep in the ocean, a bluish fish hovers in a cave. Like the dinosaurs, the fish's kind is about to become extinct. Or is it? Millions of years later, a bizarre blue fish is caught near East London, South Africa. To the museum curator who first studies it, it looks like an ancient fossil fish. But it can't be.

Fossil fish found alive : discovering the coelacanth

The coelacanths (/ ? s i? l ? k æ n ? / SEE-l?-kanth) constitute a now-rare order of fish that includes two extant species in the genus *Latimeria*: the West Indian Ocean coelacanth (*Latimeria chalumnae*) primarily found near the Comoro Islands off the east coast of Africa and the Indonesian coelacanth (*Latimeria menadoensis*). They follow the oldest-known living lineage of Sarcopterygii ...
