Among the few truly experimental composers in our cultural history, Harry Partch's life (1901-1974) and music embody most completely the quintessential American rootlessness, isolation, pre-civilized cult of experience, and dichotomy of practical invention and transcendental visions. Having lived mostly in the remote deserts of Arizona and New Mexico with no access to formal training, Partch naturally created theatrical ritualistic works incorporating Indian chants, Japanese kabuki and Noh, Polynesian microtones, Balinese gamelan, Greek tragedy, dance, mime, and sardonic commentary on Hollywood and commercial pop music of modern civilization. First published in 1949, *Genesis of a Music* is the manifesto of Partch's radical compositional practice and instruments (which owe nothing to the 300-year-old European tradition of Western music.) He contrasts Abstract and Corporeal music, proclaiming the latter as the vital, emotionally tactile form derived from the spoken word (like Greek, Chinese, Arabic, and Indian musics) and surveys the history of world music at length from this perspective. Parts II, III, and IV explain Partch's theories of scales, intonation, and instrument construction with copious acoustical and mathematical documentation. Anyone with a musically creative attitude, whether or not familiar with traditional music theory, will find this book revelatory.

Partch explains the philosophy of composition that underlies the forty-three tone works and instruments he has created.

Now in paper for the first time, *Bitter Music* is a generous volume of writings by one of the twentieth century's great musical iconoclasts. Rejecting the equal temperament and concert traditions that have dominated western music, Harry Partch adopted the pure intervals of just intonation and devised a 43-tone-to-the-octave scale, which in turn forced

him into inventing numerous musical instruments. His compositions realize his ideal of a corporeal music that unites music, dance, and theater. Winner of the ASCAP-Deems Taylor Award, *Bitter Music* includes two journals kept by Partch, one while wandering the West Coast during the Depression and the other while hiking the rugged northern California coastline. It also includes essays and discussions by Partch of his own compositions, as well as librettos and scenarios for six major narrative/dramatic compositions.

Bonded Leather binding

Examines the impact of Harry Partch's hobo years from a variety of perspectives, exploring how the composer both engaged and frustrated popular conceptions of the hobo.

Visionary composer, theorist, and creator of musical instruments, Harry Partch (1901-1974) was a leading figure in the development of an indigenously American contemporary music. A pioneer in his explorations of new instruments and new tunings, Partch created multimedia theater works that combine sight and sound in a compelling synthesis. He is acknowledged as a major inspiration to postwar experimental composers as diverse as György Ligeti, Lou Harrison, Philip Glass, and Laurie Anderson, and his book *Genesis of a Music*, first published in 1949, is now considered a classic. This book is the first to tell the complete story of Partch's life and work. Drawing on interviews with many of Partch's associates and on the complete archives of the Harry Partch Estate, Bob Gilmore provides a full and sympathetic portrait

of this extraordinary creative artist. He describes Partch's complicated relationships with friends, patrons, the musical establishment, and the world at large. He traces Partch's upbringing in the remote desert towns of the Southwest, his explosive encounter with formal music education in Los Angeles, and his revolutionary course as a composer that began with an interest in the musicality of speech patterns. After immersing himself in hobo subculture during the Depression, Partch came to occupy a lonely and uncompromising position as a cultural outsider. Richly fascinating in themselves, Partch's compositions, writings, and life also have much to reveal about American society and the creative impulses of the artistic avant-garde.

"A fascinating and genuinely accessible guide....Educating, enjoyable, and delightfully unscary." Classical Music What if Bach and Mozart heard richer, more dramatic chords than we hear in music today? What sonorities and moods have we lost in playing music in "equal temperament"—the equal division of the octave into twelve notes that has become our standard tuning method? Thanks to How Equal Temperament Ruined Harmony, "we may soon be able to hear for ourselves what Beethoven really meant when he called B minor 'black'" (Wall Street Journal). In this "comprehensive plea for more variety in tuning methods" (Kirkus Reviews), Ross W. Duffin presents "a serious and well-argued case" (Goldberg Magazine) that "should make any contemporary musician think differently about tuning" (Saturday Guardian).
