geography, health, careers, and life. Long-term Investigation projects engage students in interesting and relevant applications of mathematics. Modeling Mathematics empowers students to think mathematically as they use charts, graphs, concrete models, hands-on manipulatives, open-ended questions, and chapter projects to discover mathematical concepts. Graphing Technology lessons makes the focus on modeling and functions attractive and accessible to all students.

The first full-length study of one of the territorial rain cults; and an endeavour to preserve knowledge about a rapidly changing complex system of traditional beliefs, rituals, and practices, under the influence of Christianity, Islam, and western education. Within this cult, a person who is possessed by the spirit of the ancestors is commonly known as Bimbi: the seer, a charismatic and moral leader, to whom the community ascribes a prophetic role. As a religious system, the Bimbi cult has an intricate system of agricultural rituals such as rainmaking ceremonies, a distinctive unwritten theology, elaborate liturgical observances and an organised, inherited priesthood. Studying the Bimbi cult from a multi-disciplinary perspective, the author illustrated how traditional beliefs and practices still have a grip on people in the countryside, who live in an agricultural subsistence economy, and at the mercy of ecological forces. He contends that these forces will continue to shape their understanding of God, themselves and the world around them for many years to come, unless these people change from an agricultural to an industrial society.

The top-selling Algebra 1 program in America! Glencoe Algebra 1 is noted for bringing math
