Read Book Health Care Federalism In Canada Critical Junctures And Critical Perspectives

Now that Ottawa has left health care to the provinces, what is the future for Canadian health care in a decentralized federal context? Is the Canada Health Act dead? Health Care Federalism in Canada provides a multi-perspective, interdisciplinary analysis of a critical juncture in Canadian public policy and the contributing factors which have led to this point. Social scientists, legal scholars, health services researchers, and decision-makers examine the shift from a system where Ottawa has played a significant, sometimes controversial role, to one where provinces have more ability to push health care design in new directions. Will this change inspire innovation and collaboration, or inequality and confusion? Providing an up-to-date analysis of health care policy and intergovernmental relations at a crucial time, Health Care Federalism in Canada will be of interest to anyone concerned with the current dynamics and future potential of Canadian health care. Contributors include Greg Marchildon (Canada Research Chair at the Johnson-Shoyama Graduate School of Public Policy in Saskatchewan), Ken Boessenkool (public affairs strategist and former political advisor to Stephen Harper), Adrian Levy (Professor and Head, Department of Community Health and Epidemiology at Dalhousie University), Boris Sobolev (Canada Research Chair at the School of Public and Population Health, University of British Columbia), Gail Tomblin Murphy (Director, WHO Collaborating Centre for Health Workforce Planning and Research), and David Haardt (Department of Economics, Dalhousie University).

Rethinking the future of health care in Canada.

The Oxford Handbook of the Canadian Constitution provides an ideal first stop for Canadians and non-Canadians seeking a clear, concise, and authoritative account of Canadian constitutional law. The Handbook is divided into six parts: Constitutional History, Institutions and Constitutional Change, Aboriginal Peoples and the Canadian Constitution, Federalism, Rights and Freedoms, and Constitutional Theory. Readers of this Handbook will discover some of the distinctive features of the Canadian constitution: for example, the importance of Indigenous peoples and legal systems, the long-standing presence of a French-speaking population, French civil law and Quebec, the British constitutional heritage, the choice of federalism, as well as the newer features, most notably the Canadian Charter of Rights and Freedoms, Section Thirty-Five regarding Aboriginal rights and treaties, and the procedures for constitutional amendment. The Handbook provides a remarkable resource for comparativists at a time when the Canadian constitution is a frequent topic of constitutional commentary. The Handbook offers a vital account of constitutional challenges and opportunities at the time of the 150th anniversary of Confederation.

Looking at Canada, Brazil, Germany, Mexico, Nigeria, Pakistan, South Africa and Switzerland, Federalism and Decentralization in Health Care examines the overall organization of the health system.

Examining the changing nature of health care federalism within a competitive global context, Comparative Health Care Federalism provides a rich and nuanced account of the way in which the interplay of federal relationships impact health care within an array of systems. The editors have gathered together some of the leading international health policy scholars to provide detailed accounts of the dynamics of federal health policy-making within their respective jurisdictions. Complementing the theoretical and methodological objectives, this book provides a detailed, empirical description of the challenges faced by different states and the ways in which health policy-making works within the federal, quasi-federal, and functional federal systems presented. In chapters on the United States, Australia, Canada, Germany, Spain, Italy, Austria,

the United Kingdom, the EU, India, China, Brazil, and the Russian Federation the authors consider what variables contribute to, and stand in the way of, the formation of robust and sustainable health care systems.

Examining the changing nature of health care federalism within a competitive global context, *Comparative Health Care Federalism* provides a rich and nuanced account of the way in which the interplay of federal relationships impact health care within an array of systems. Complementing the theoretical and methodological objectives, this book provides a detailed, empirical description of the challenges faced by different states and the ways in which health policy-making works within each of the federal, quasi-federal, and functional federal systems presented. The authors consider what variables contribute to the formation of robust and sustainable health care systems.

Why has health care reform proved a stumbling block for provincial governments across Canada? What efforts have been made to improve a struggling system, and how have they succeeded or failed? In *Paradigm Freeze*, experts in the field answer these fundamental questions by examining and comparing six essential policy issues - regionalization, needs-based funding, alternative payment plans, privatization, waiting lists, and prescription drug coverage - in five provinces. Noting hundreds of recommendations from dozens of reports commissioned by provincial governments over the last quarter century - the great majority to little or no avail - the book focuses on careful diagnosis, rather than unplanned treatment, of the problem. *Paradigm Freeze* is based on thirty case studies of policy reform in Alberta, Saskatchewan, Ontario, Quebec, and Newfoundland and Labrador. The contributors assess the nature and extent of healthcare reform in Canada since the beginning of the 1990s. They account for the generally limited extent of reform that has occurred, and identify the factors associated with the relatively few cases of large reform. An insightful new perspective on a problem that has plagued Canadian governments for decades, *Paradigm Freeze* is an important addition to the field of health policy. Contributors include John Church (University of Alberta), Michael Ducie (Alberta Health and Wellness), Pierre-Gerlier Forest (Pierre Elliott Trudeau Foundation), Stephen Tomblin (Memorial University), Jeff Braun Jackson (Ontario Professional Firefighters Association, Burlington, ON), Marie-Pascale Pomey (Université de Montréal), John N. Lavis (McMaster University), Harvey Lazar (Queen's University), Elisabeth Martin (Université Laval), Tom McIntosh (University of Regina), Dianna Pasic (McMaster University), Neale Smith (University of British Columbia), and Michael G. Wilson (McMaster University).

An exploration of the ways in which federal and provincial governments relate to one another, and to the citizenry, in the making of health policy.

An examination of whether federal institutions influence policy outcomes in the health sector.
