ranging from epidemiology to prognosis. This book is unique in its conception and presentation, as not only it provides new information but also offers a balanced and rational approach to diseases of liver, pancreas, and biliary system. One of the characteristic features of the book is inclusion of diseases of pancreas and separate chapters on important topics like cytokines and chemokines and apoptosis in liver diseases, as a sound background in these is essential for becoming a good specialist. It contains a chapter on evidence-based clinical practice in hepatology, which is the basis of modern clinical practice. It also includes a chapter on preventive aspects of hepato-biliary diseases

whole spectrum of hepatobiliary diseases by some of the world's leading hepatologists and hepatobiliary specialists. Where many other hepatology textbooks provide detailed accounts of basic science and clinical management, Sherlock's Diseases of the Liver and Biliary System, 13th Edition takes a different approach. Concentrating on the clinical decisions to be taken and the relevant supporting data, it is written and edited to maintain Sheila Sherlock's unique approach, in particular the clarity and layout of the text, and the explanatory figures and tables. The book is thus concise, highly accessible, and generously illustrated with over 700 attractive color figures. There is a

liver disease to each disease based both on evidence and on the authors' experience, the hallmark of this book. Based on these elements, the 12th edition was awarded first prize in the 2012 British Medical Association Book Awards in the Internal Medicine category. Sherlock's Diseases of the Liver and Biliary System begins by introducing the anatomy and function of the liver to readers, continuing then with in-depth coverage of liver biopsy techniques and interpretation, and fibrogenesis and its assessment. There are then chapters on all aspects of liver and biliary disease including acute liver failure, cirrhosis, portal hypertension, hepatic encephalopathy, ascites, hepatitis
