A better way to learn maternal and newborn nursing! This unique presentation provides tightly focused maternal-newborn coverage in a highly structured text

Prepare for success on your HESI exit exam and the NCLEX-RN? HESI Comprehensive Review for the NCLEX-RN? Examination, 4th Edition provides a comprehensive, all-in-one review of the information you need to know. Written in an easy-to-read outline format, this study tool breaks down chapters by clinical areas and concepts emphasized on the NCLEX-RN exam. Rationales are provided for any incorrect answers or areas of weakness. The companion Evolve website offers 700 practice questions, giving you valuable practice in the same electronic testing format you will experience on your nursing school exit exam and on the NCLEX-RN exam.

In the realm of health care, privacy protections are needed to preserve patients' dignity and prevent possible harms. Ten years ago, to address these concerns as well as set guidelines for ethical health research, Congress called for a set of federal standards now known as the HIPAA Privacy Rule. In its 2009 report, Beyond the HIPAA Privacy Rule: Enhancing Privacy, Improving Health Through Research, the Institute of Medicine's Committee on Health Research and the Privacy of Health Information concludes that the HIPAA Privacy Rule does not protect privacy as well as it should, and that it impedes important health research.

The first medical specialty selection guide written by residents for students! Provides an inside look at the issues surrounding medical specialty selection, blending first-hand knowledge with useful facts and statistics, such as salary information, employment data, and match statistics. Focuses on all the major specialties and features firsthand portrayals of each by current residents. Also includes a guide to personality characteristics that are predominate with practitioners of each specialty. "A terrific mixture of objective information as well as factual data make this book an easy, informative, and interesting read." --Review from a 4th year Medical Student

This pocket-sized book, presented in an easy-to-follow format, is designed as a tool for students and professionals to carry in any setting, providing a quick reference guide to supporting women and babies during the postnatal/neonatal period. Written in an accessible way, this book provides step-by-step processes for students to follow, and is ideal for professionals to share with the women and families in their care.

Safely and effectively administer more than 400 intravenous drugs with the expert guidance of this #1 IV drug handbook! Now in its 33rd edition, Gahart's 2017 Intravenous Medications: A Handbook for Nurses and Health Professionals continues to be a trusted resource its accuracy, quick-reference format, and comprehensive coverage of IV drugs. Each drug monograph includes the drug's generic name, trade name(s), drug category, pH, dosages and dose adjustments, dilution, incompatibilities, rate of administration, actions, indications and uses, contraindications, precautions, drug/lab interactions, side effects, and antidote. It's all of the information you will need for the safe administration of IV drugs — nothing more and nothing less. UNIQUE! Annual publication ensures that information includes the most recently approved IV drugs, as well as updated information on existing drugs. 40-year history of impeccable accuracy reinforces the importance of safe IV drug administration. UNIQUE! Time-tested, easy-to-use page layout keeps all dosage information for each drug on either a single page or a two-page spread to prevent hand contamination by having to turn a page. Black Box Warnings and key content are highlighted to make locating key information fast and easy. Special circumstances highlighted in blue-screened text call attention to important circumstances that may not warrant black box warnings. Convenient, alphabetical format organizes all drug monographs by generic name, allowing you to find any drug in seconds. Dilution and dosage charts within monographs provide quick access to essential clinical information. Age-specific dosage variances are highlighted for geriatric, pediatric, infant, and neonatal patients. NEW! 15 new drug monographs provide current, clinically relevant drug information for new IV drugs recently approved by the FDA. NEW! Updated drug monographs throughout reflect the latest changes in IV drug therapy. NEW! Do Not Confuse With information is added at the top of each applicable monograph to enhance medication safety, and the Evolve companion website includes a link to the ISMP list of Do Not Confuse drug names. NEW! Reorganized drug side effects reflect the latest information on frequency, seriousness, and other important considerations. NEW! Alphabetical thumb tabs on the left-hand pages make it easier to look up drug monographs.

About: To prepare you for real world practice, this book will highlight content areas most relevant to the bedside and why they must be mastered and understood. To help visualize the professional development that is needed as you transition to the responsibilities of the professional nurse, I use the metaphor of building a house; not a static structure, but a unique, vibrant "living" house that is a reflection of how you choose to build and add to it over time. Nursing is a living and vibrant practice that requires your personal involvement and engagement to promote the well-being of those you care for. The components of this "living" home include:

Foundation: A house must have a firm and stable foundation. The ethical comportment or the art of nursing is this foundation for every nurse. Caring behaviors, nurse engagement, and professionalism in practice must be present or your nursing practice could be on shaky ground before it even begins! Walls: The applied sciences of nursing: pharmacology, fluid and electrolytes, and anatomy and physiology. I contextualize these sciences to the bedside so the relevance of mastering this content becomes apparent. Roof: Critical thinking and clinical reasoning, which is the thinking that is required by the nurse that completes the house and ties everything together. Skeletons in the closet: Every house has closets and some have a few skeletons in them! Incivility and men in nursing will be explored in detail!
