Iguana Facts | Live Science

Iguanas are native to the jungles of central and south America, and the Caribbean. The iguana is a large docile species of lizard, meaning that iguanas are often a popular choice when keeping exotic pets. Iguanas have excellent sight allowing the iguana to detect movement from incredibly long distances.

Iguana (Iguana Iguana) | Incredible Facts | A-Z Animals

The iguana is a tropical animal. It wants to bask at 95 degrees Fahrenheit, and its habitat shouldn't drop below 75 degrees Fahrenheit. In fact, the iguana needs a temperature around 85 degrees Fahrenheit to properly digest its food. This should be closely monitored, especially if you're adjusting the climate of an entire room for its habitat.

A Guide to Caring for Iguanas as Pets

The green iguana (*Iguana iguana*), also known as the American iguana, is a large, arboreal, mostly herbivorous species of lizard of the genus *Iguana*. Usually, this animal is simply called the iguana. The green iguana ranges over a large geographic area; it is native from southern Brazil and Paraguay as far north as Mexico, and has been introduced from South America to Puerto Rico and is very ...
