Illustrated International Pickup and Scout Buyer's Guide Tom Brownell This invaluable guide covers all of International's light trucks beginning with 197's Auto Wagon and culminating with the last Scout to roll off the line in 198. Model histories, production numbers, technical specs, buying tips, and nearly 2 photos make it easy to put the right International in your garage! Sftbd., 7 1/2x 9 1/4, 128 pgs., 179 b&w ill.

The first axial flow combine transformed the industry and was hailed as the most significant piece of farm equipment built in the 20th century. The axial flow used advanced technology to process crops faster and more efficiently than anything else on the market. The axial flow started with research done by a rogue Swedish engineer in the 1950s, was continued in secret by a group of dedicated engineers from East Moline, Illinois, who did their work in a top-secret garage that only a select few were allowed to enter. The book tells the story of how extensive research and development allowed IH to build a new machine that took the market by storm. Done with dozens of interviews of engineers, salespeople, and customers, the book captures the behind-the-scenes drama and the cloak and dagger encounters with rival companies' personnel and machines. The dramatic text is accompanied by more than 300 archival images, concept drawings, sketches, and new photography of the machines and men at work today.

The story of the four-wheel-drive tractors built by Steiger, International Harvester, Case, and Case IH is told in dramatic fashion in this authoritative guide. Starting with the development of early four-wheel-drive systems at International Harvester, the book traces the evolution and design of some of the most powerful and capable tractors of the twentieth century. With fresh detail on the 4300, 4100, Steiger-built IH

tractors, and the 2+2 tractors including the Super 70 series, the book offers prototype drawings of several models--including the complete story of the never-before-published Magnum 2+2-- as well as inside stories and backroom drama that is a must for any enthusiast for farm history or tractors. Learn the complete story of Steiger tractors, which were originally designed and built in the barn of John, Douglass, and Maurice Steiger located near Red Lake Falls, Minnesota. Containing interviews with more than 50 of the people who built Steiger from its humble origin to a world leader, the book traces the evolution of the lime green Steigers in engrossing detail. The book also covers the J.I. Case 4WD line in great detail. In addition, the book tells the story of how each of these significant players in the industry combined under one banner and--together--created one of the current industry-leading technologies, the Quadtrac. The modern evolution of the Steigers and the introduction of the STX Series (and more) also receive in-depth coverage. The same team that created the award-winning books Red Tractors 1958-2013 and Red Combines 1915-2015 created this book, and notable new contributors include Sherry Schaefer (editor of Heritage Iron magazine) and noted historian Jim Allen. Contributors include Sherry Schaefer, Oscar H. Will III, Jim Allen, Kenneth Updike, Todd Markle, Gregg Montgomery, Guy Fay, Martin Rickatson, Sarah Tomac, Matthias Buschmann, Jean Cointe, Michael Osweiler, and Johann Dittmer.

International Harvester Trucks: The Complete History tells the complete story of the light, medium, and heavy-duty trucks, vans, and station wagons built by International Harvester during over a century of production.

A tractor repair manual written for the experienced mechanic by professionals in an easy-to-use format , including numerous photos, illustrations and exploded views.
