Forensic anthropology is an applied subfield of biological anthropology that provides expert analysis of the skeleton in a medico-legal setting by utilizing methods developed in skeletal biology, archaeology, and the forensic sciences.

Introduction to Forensic Anthropology - New York University

Forensic anthropology, application of physical anthropology to legal cases, usually with a focus on the human skeleton. Forensic anthropology uses the techniques of physical anthropology to analyze skeletal, badly decomposed, or otherwise unidentified human remains to solve crimes. Forensic anthropologists can assess the age, sex, and unique features of a decedent and are invaluable in documenting trauma to the body and estimating how long a corpse has been decomposing.
