Abstract. Effects of gases flowing
in a magnetic field analogous to the
Hall effect and planar Hall effect in
conductors are investigated. It is
shown that for oxygen those
effects are not functions of H/P
only, that is in contradiction with
the existing theory.

On the influence of a magnetic
field on viscous gas flow ...

For a molecule, T is the absolute temperature of the system, and k is Boltzmann's constant. The probability that the absolute value of the velocity lies between v and $v + \Delta v$ follows from (1) and has the form. This probability reaches a maximum when $v = v_0$. The velocity v_0 is called the most probable molecular velocity.
