In the most reliable and readable guide to effective writing for the Americans of today, Wilson answers questions of meaning, grammar, pronunciation, punctuation, and spelling in thousands of clear, concise entries. His guide is unique in presenting a systematic, comprehensive view of language as determined by context. Wilson provides a simple chart of contexts—from oratorical speech to intimate, from formal writing to informal—and explains in which contexts a particular usage is appropriate, and in which it is not. The Columbia Guide to Standard American English provides the answers to questions about American English the way no other guide can with: * an A–Z format for quick reference; * over five thousand entries, more than any other usage book; * sensible and useful advice based on the most current linguistic research; * a convenient chart of levels of speech and writing geared to context; * both descriptive and prescriptive entries for guidance; * guidelines for nonsexist usage; * individual entries for all language terms. A vibrant description of how our language is being spoken and written at the end of the twentieth century—and how we ourselves can use it most effectively—The Columbia Guide to Standard American English is the ideal handbook to language etiquette: friendly, sensible, and reliable.

Examining the place of nature in Victorian women's poetry, Fabienne Moine explores the work of canonical and long-neglected women poets to show the myriad connections between women and nature during the period. At the same time, she challenges essentialist discourses that assume innate affinities between women and the natural world. Rather, Moine shows, Victorian women poets mobilised these alliances to defend common interests and express their engagement with social issues. While well-known poets such as Elizabeth Barrett Browning and Christina Rossetti are well-represented in Moine's study, she pays particular attention to lesser known writers such as Mary Howitt or Eliza Cook who were popular during their lifetimes or Edith Nesbit, whose verse has received scant critical attention so far. She also brings to the fore the poetry of many non-professional poets. Looking to their immediate cultural environments for inspiration, these women reconstructed the natural world in poems that raise questions about the validity and the scope of representations of nature, ultimately questioning or undermining social practices that mould and often fossilise cultural identities.
