Many lamps have light-sensitive photocells that activate the lamp automatically when needed, at times when there is little to no ambient light, such as at dusk, dawn, or at the onset of dark weather conditions. This function in older lighting systems could be performed with the aid of a solar dial. Many street light systems are being connected underground instead of wiring from one utility post ...

Some people don't like the quality of light given out by LED light bulbs, as some can produce a cooler bluish light. The best LEDs will be indistinguishable from your old incandescent bulbs and be able to produce a nice warm light. We've heard some cases where a small number of LED light bulbs can interfere with DAB radio signals.

Grow lights either attempt to provide a light spectrum similar to that of the sun, or to provide a spectrum that is more tailored to the needs of the plants being cultivated. Outdoor conditions are mimicked with varying colour, temperatures and spectral outputs from the grow light, as well as varying the intensity of the lamps. Depending on the type of plant being cultivated, the stage of ...
