This is a book about strategic coordination broadly conceived, covering both legislative and executive elections, both strategic entry and strategic voting. It investigates the consequences of strategic coordination and those structural features that determine the nature of the coordination problems that political actors face in differing polities.

"Making Votes Count" Abstract | Gary W. Cox
That every voter votes so as to maximize its expected utility is a postulate and needs no further confirmation. And strategic voting is a necessary instrument for any rational human being to make his vote count. The book does not lack complete originality, though. Cox refines two of Duverger's theories.

and 1927. With this research design we believe we can isolate strategic coordination between existing parties. Following the standard theoretical understanding of strategic coordination, we expect the lower incentive to vote strategically under PR to lead to more votes for parties that were not competitive in 1918. We find precisely this dynamic, par-
