When Dr. Carter investigates the murder of a young Black boy, he uncovers a government conspiracy to segregate the country's African-American communities

This book, first appearing in German in 2004 under the title *Spezielle Relativitätstheorie für Studienanfänger*, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually,

a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions. Hav is like no place on earth.  
Rumored to be the site of Troy,  
captured during the crusades and  
recaptured by Saladin, visited by  
Tolstoy, Hitler, Grace Kelly, and  
Princess Diana, this Mediterranean  
city-state is home to several  
architectural marvels and an annual  
rooftop race that is a feat of  
athleticism and insanity. As Jan  
Morris guides us through the  
corridors and quarters of Hav, we  
hear the mingling of Italian, Russian,  
and Arabic in its markets, delight in its  
famous snow raspberries, and meet  
the denizens of its casinos and cafés.  
When Morris published Last Letters  
from Hav in 1985, it was short-listed  
for the Booker Prize. Here it is joined  
by Hav of the Myrmidons, a sequel

that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris ' s only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.
