This paper highlights that the 1978 World Bank Annual Meeting, held in Washington, D.C. during September 25–28, 1978, emphasized that greater efforts need to be made by both developed and developing countries, on domestic as well as international fronts, to stimulate lagging growth and to improve the well-being of the poorest. Just as developing countries agreed that economic takeoff was based as much on their own internal policies as on the external environment, the industrialized nations acknowledged that their own economic well-being was more closely linked to the growth of the Third World.

Presents the basic principles required for the testing and development of internal combustion engine powertrain systems, providing the new automotive engineer with the basic tools required to effectively carry out meaningful tests.

This book is based on publications from the ISCA Tutorial and Research Workshop on Multi-Modal Dialogue in Mobile Environments held at Kloster Irsee, Germany, in 2002. The workshop covered various aspects of devel- ment and evaluation of spoken multimodal dialogue systems and components with particular emphasis on mobile environments, and discussed the state- the-art within this area. On the development side the major aspects addressed include speech recognition, dialogue management, multimodal output gene- tion, system architectures, full applications, and user interface issues. On the evaluation side primarily usability evaluation was addressed. A number of high quality papers from the workshop were selected to form the basis of this book. The volume is divided into three major parts which group together the ov- all aspects covered by the workshop. The selected papers have all been - tended, reviewed and improved after the workshop to form the backbone of the book. In addition, we have supplemented each of the three parts by an invited contribution intended to serve as an overview chapter.

This best-selling brief introduction to public speaking offers practical coverage of every topic typically covered in a full-sized text, from invention, research and organization, practice and delivery, to the different speech types. Its concise, inexpensive format makes it perfect not only for the public speaking course, but also for any setting across the curriculum, on the job, or in the community. This newly redesigned full-color edition offers even stronger coverage of the fundamentals of speechmaking, while also addressing the changing realities of public speaking in a digital world. It features fully updated chapters on online presentations and using presentation software, and a streamlined chapter on research in print and online.

This book examines why workplaces around the world have become involved in childcare and the nature of the programs that have been implemented. It provides an overview of diverse workplace initiatives beyond traditional preschool care. Partnership is a key theme, and the authors highlight the fruitfulness of collaborations that combine the resources and capabilities of different actors. Ten industrialized and developing countries are examined through a national overview on policies and facilities for childcare and the implications for working parents, followed by case studies of specific workplaces. The studies provide considerable detail on why the childcare support was started, how it is funded and managed, how various partners are involved, and the perspectives of workers and employers on the support provided. The book shows how support for childcare has been organized and funded in a variety of workplaces and the diversity of the partnerships that have evolved in both developing and industrialized countries. It will be a useful resource for policymakers and workplace partners looking for practical ways to help working parents with their childcare needs.
