**Sliding / No Separation (Nastran: Slide)** With this type of contact the element will act similar to a welded contact element in tension and compression, but will slide in-plane. Friction is ignored for this contact type, so contact data should not include friction settings. Slide contact can be used in linear and nonlinear solutions.

Now that you have explored the basics, it is time to start creating your own simulations using the Autodesk Inventor Nastran software. The techniques you have seen demonstrated in these quick start videos and tutorial will help you with your own structural analyses. In addition, you can analyze steady-state and transient heat transfer, linear dynamics (vibration and shock, including nonlinear and transient response), nonlinear static stress, linear and nonlinear buckling, and fatigue.
