The purposes, principles, practices, and protocols of research program peer review are described. While the principles are fundamentally generic, and apply to peer review across the full spectrum of performing institutions as well as manuscript, proposal, and program peer review, the focus of this report is peer review of proposed and ongoing research programs in federal agencies. Following the self-contained Executive Summary of factors for high-quality peer reviews, the report addresses potential implications of the implementation of the Government Performance and Results Act of 1993 on federal agency research program peer review practices. Then, the report describes strengths and weaknesses of major peer review components and issues, including the following: Objectives and Purposes of Peer Review; Quality of Peer Review; Impact of Peer Review Manager on Quality; Selection of Peer Reviewers; Selection of Evaluation Criteria; Secrecy (Reviewer and Performer Anonymity); Objectivity, Bias, and Fairness of the Peer Review; Normalization of Peer Review Panels; Repeatability and Reliability of the Peer Review; Effectiveness and Predictability of Peer Review; Global Data Awareness; Costs of Performing a Peer Review; Ethical Issues in Peer Review; and Alternatives to Peer Review. The report then presents different federal agency peer review practices as well as sample

In the age of big data, being able to make sense of data is an important key to success. Interactive Visual Data Analysis advocates the synthesis of visualization, interaction, and automatic computation to facilitate insight generation and knowledge crystallization from large and complex data. The book provides a systematic and comprehensive overview of visual, interactive, and analytical methods. It introduces criteria for designing interactive visual data analysis solutions, discusses factors influencing the design, and examines the involved processes. The reader is made familiar with the basics of visual encoding and gets to know numerous visualization techniques for multivariate data, temporal data, geo-spatial data, and graph data. A dedicated chapter introduces general concepts for interacting with visualizations and illustrates how modern interaction technology can facilitate the visual data analysis in many ways. Addressing today's large and complex data, the book covers relevant automatic analytical computations to support the visual data analysis. The book also sheds light on advanced concepts for visualization in multi-display environments, user guidance during
