Preparation. In the preparation stage, the main focus is defining the problem, data selection and data preparation. It is where a roadmap is designed, that describes the stages of the following proof of concept. Problem definition: This is the first, and most important step in the preparation stage. Machine learning problems often fail because ...

What is a Proof of Concept (and how to make the most of it)?

The first thing I'd like to say is that some students require no real preparation for rigorous math. As soon as they start reading introductory algebra or analysis, they immediately "get" proofs. Others struggle, though, because they are confronting two problems at once: learning to write proofs and learning unfamiliar concepts at the same time.
