Following its foundation in 1957, the European Economic Community set about establishing itself as a major player on the world stage. One of the first key arenas in which the new organisation began to make its presence felt was the GATT negotiations that took place between 1963 and 1967, known as the Kennedy Round. Through a reconstruction of these on-going negotiations, this book charts the emergence of the EEC as a world trading power and the strategies it adopted that were to have a lasting effect upon European trade policies. As well as proving an important background to the Kennedy Round, the study explains how the EEC/European Union became a powerful actor in international trade, championing a liberal attitude toward the industrial sector but a protectionist one in agriculture. It also addresses the impact of the EEC/EU as regional trading area on the multilateral and global trading system and the EEC/EU trade policy-making. Through an historical analysis of these topics, a much fuller understanding of the actual role and stance of the EEC/EU in world trade is provided, one that not only illuminates events at the time, but provides essential background to the challenges still faced by the international trading system and the World Trade Organization. Based on a wealth of documentary research drawn from European and US archives, this book will be welcomed by all wishing to better understand the complex nature of international trade in an increasingly globalised market place.

This book bridges the research and practice of global talent management. It opens important theoretical and practical avenues to understand the concept internationally while focusing on developing and emerging countries. Chapters derive from various geographic regions and embrace cross-national, comparative, and interdisciplinary perspectives. An open and inclusive approach is used in assessing the challenges of global talent management, strategies to overcome these challenges, and in charting opportunities for future talent management. These three dimensions are crucial to academic researchers and business practitioners for envisioning a positive future role of talent management in businesses and societies.
