Emphasises on contemporary applications and an intuitive problem-solving approach that helps students discover the exciting potential of chemical science. This book incorporates fresh applications from the three major areas of modern research: materials, environmental chemistry, and biological science.

With clear, comprehensive and compact notes, EXPRESS is the best revision aid to help you tackle your upcoming SPM examinations! Here's a peek into what Express has to offer you: Chapter outline and concept map for a quick chapter overview Complete experiments which are especially tailored according to PEKA requirements Quick check which has exam-styled questions for review and reinforcement Quick test (exam-oriented questions) for self-evaluation of the understanding of each chapter Tips to enlighten students on: Common mistakes made in the examination Important facts to remember

Dramatic progress has been made in all branches of physics since the National Research Council's 1986 decadal survey of the field. The Physics in a New Era series explores these advances and looks ahead to future goals. The series includes assessments of the major subfields and reports on several smaller subfields, and preparation has begun on an overview volume on the unity of physics, its relationships to other fields, and its contributions to national needs. Nuclear Physics is the latest volume of the series. The book describes current activity in understanding nuclear structure and symmetries, the behavior of matter at extreme densities, the role of nuclear physics in astrophysics and cosmology, and the instrumentation and facilities used by the field. It makes recommendations on the resources needed for experimental and theoretical advances in the coming decade.

Mario Carranza studies in depth the linkages between Indo-Pakistani nuclear relations and the International Nuclear Order. He critically analyzes the de facto recognition by the United States of India and Pakistan as nuclear weapon states and looks at the impact of that recognition on the International Nuclear Order and its linchpin, the Nuclear Non-Proliferation Treaty (NPT). The book provides a critical analysis of the New International Nuclear Order sponsored by the United States after the September 11 terrorist attacks and the place of India and Pakistan in that order. The author considers the survival of India and Pakistan in relation to a strategy of nuclear deterrence and debates the possibility of establishing a robust nuclear arms control regime in South Asia as part of a broader effort to revive global nuclear arms control and disarmament
