How to Practice Self-Regulation - Verywell Mind

Self-regulation is the ability to understand and manage your emotions and behaviour in response to things happening around you. It helps you to control your impulses (to make better decisions), to not over-react when upset or excited, and to be able to calm down after an incident, should one occur. Self-regulation is initially learned through co-regulation.

Helping Children to Self-Regulate - Behaviour Matters

Self-regulation. Self-regulation is the ability to stay regulated without the help of others. It is the ability to use your own strategies to either calm down or energise. Some individuals need more help to learn how to self-regulate than others. Often individuals with ADHD and ASD need more support to learn to self-regulate. Sensory regulation strategies can help with self-regulation. As can cognitive strategies. We will explore these further below.

Sensory regulation strategies - how you can use them to ...

Metacognition and self-regulation approaches aim to help pupils think about their own learning more explicitly, often by teaching them specific strategies for planning, monitoring and evaluating their learning. Interventions are usually designed to give pupils a repertoire of strategies to choose from and the skills to select the most suitable strategy for a given learning task.
