i.e., "the set of principal design decisions about the system".

Architecture permeates all major facets of a software system, for principal design decisions may potentially be made at any time during a system's lifetime, and potentially by any stakeholder.

system. We reject the notion that software architecture is just another name for “high level design” or the components-and-connectors view of a system.

Rather, architecture is a discipline, rooted in design, that persists throughout a system’s entire lifecycle.
