Is perception reality? Editor Melanie Metzger investigates the cultural perceptions by and of deaf people around the world in Bilingualism and Identity in Deaf Communities volume six of the Sociolinguistics series.

Estar abierto a la diversidad es algo que posibilita salud emocional, bienestar personal y visión amplia sobre el sentido de la vida. Con este libro, hemos tratado mis alumnas, grandes profesionales de la Educación Primaria, y yo como psicólogo - orientador de un Equipo de Orientación Educativa y Psicopedagógica y preparador de Oposiciones para maestros de Infantil, Primaria y Secundaria, dar una modesta pero práctica visión de lo que el Maestro de Primaria ha de llevar a cabo para que su práctica docente, con respecto a la diversidad del alumnado debe de aportar. Igualmente, deseamos contribuir a que el profesorado de Educación Primaria pueda preparar concienzudamente la parte práctica de la Oposición con todas las garantías de éxito. Estos diez supuestos que han sido elaborados y analizados por todas las autoras del libro con la supervisión, dirección y orientación del Coordinador Pedro Nicolás Franco, posibilitan igualmente que el profesorado que está ejerciendo su labor docente actualmente pueda reforzar su labor educativa.

Although there are several gaps in understanding the many issues related to neurological disorders, we know enough to be able to shape effective policy responses to some of the most common. This book describes and discusses the increasing public health impact of common neurological disorders such as dementia, epilepsy, headache disorders, multiple sclerosis, neuroinfections, neurological disorders associated with malnutrition, pain associated with neurological disorders, Parkinson's disease, stroke and traumatic brain injuries. It provides information and advice on public health interventions that may reduce their occurrence and consequences, and offers health professionals and planners the opportunity to assess the burden caused by these disorders. The clear message that emerges is that unless immediate action is taken globally, the neurological burden is likely to become an increasingly serious and unmanageable.

Epistemology is the study of how "knowledge" is formed. Standard epistemology isolates the "known" from the "knowers," thereby defining "knowledge" as objectively constant. Multiple epistemologies suggest that individuals learn in different ways shaped by life factors such as education, family, ethnicity, history, and regional beliefs. In this groundbreaking volume, editors Peter V. Paul and Donald F. Moores call on ten other noted scholars and researchers to join them in examining the many ways that deaf people see and acquire deaf knowledge. This collection considers three major groups of deaf knowledge perspectives: sociological and anthropological, historical/psychological and literary, and educational and philosophical. The first explores the adoption of a naturalized, critical epistemological stance in evaluating research; the epistemology of a positive deaf identity; how personal epistemologies can help form deaf education policies; and valuing deaf indigenous knowledge in research. The next part considers dueling epistemologies in educating deaf learners; reforms in deaf education; the role of deaf children of hearing parents in creating Deaf epistemologies; and the benefit of reading literature with deaf characters for all students. The final part explores the application of the Qualitative-Similarity Hypothesis to deaf students' acquisition of knowledge; a metaparadigm for literacy instruction in bilingual-bicultural education; collaborative knowledge-building to access academia; and examination of the benefits and disadvantages of being deaf.

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

2012 Reprint of 1962 Edition. Exact facsimile of the original edition, not reproduced with Optical Recognition Software. Vygotsky's closely reasoned, highly readable analysis of the nature of verbal thought as based on word meaning marks a significant step forward in the growing effort to understand cognitive processes. Speech is, he argues, social in origins. Speech is learned from others and, at first used entirely for affective and social functions. Only with time does it come to have self-directive properties that eventually result in internalized verbal thought. A classic work.

Lugubrious Nights follows the protagonist Tediato on his nightly visits to the temple where his beloved is interred. His ultimate intention is to disinter her body and kill himself in her presence. Tediato is a religious skeptic whose grief is cosmic, and he sees no reason not to join his beloved in death, torn as he is between the emptiness of his soul and the emptiness of the world. Hispanist Russell P. Sebold offers the first English translation of the eighteenth-century Spanish lyrical poem in prose by José de Cadalso (1741-1782). Inspired by his grief over the death of the actress María Ignacia Ibáñez, Cadalso composed Lugubrious Nights in 1771. Sebold considers it to be the first fully Romantic work of continental European literature, written three years before the publication of Goethe's Werther.
