Survival Statistics

This means that people can die while on dialysis if they do not have a kidney transplant, particularly elderly people and those with other health problems.

Someone who starts dialysis in their late 20s can expect to live for up to 20 years or longer, but adults over 75 may only survive

Dialysis cleans your

blood by filtering out

waste products and

File Type PDF

Staying Alive

fluid that your kidneys would usually get rid of as urine. Without dialysis, waste products and excess fluid stay in your body, causing you to feel unwell. Left untreated, chronic kidney disease is fatal.
