For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.

White Van Man' is a larger-than-life presence on Britain's road, but he's no fool. Given the choice, he inevitably opts for a Ford Transit...and indeed he has been doing so, more than for any other van, for the past 45-plus years. Why? Because the Transit better suits the needs of working drivers than anything else around.

Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But KASHER IN THE RYE is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and

they moved to Oakland , California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

"Because Eden's genius resides in imagination, it is a mobile spirit; always found in place but never confined by place. The spirit of Eden migrates within us, animated through our imaginative responses to actual places in the material world, in our roles as gardeners and poets, painters and photographers." --from the introduction What did Eden look like? In *Imagining Eden* the photographer Lyle Gomes observes landscapes that represent the idea of locus amoenus--the pleasant place. The tradition of locus amoenus goes back to the idyllic descriptions of fictional locations, often called Arcadia, in the writings of Sappho, Apollonius, and Virgil, in the imagined period of the Golden Age. We also recognize this concept in Eden, of course, where it suggests a loss that still haunts our imaginations. It is an idea distinctly different from that of wilderness, for we feel protected in these places--even provided for, though there is no sign of toil. The chance that this Eden might somehow be regained gives the concept its consolatory power. For fifteen years, Gomes has traveled across America and Europe to find examples of this enduring ideal of place in parks, English gardens, even golf courses. Gomes's search took him to Mount Auburn cemetery, Central Park, Monticello, the San Francisco Presidio, villa gardens near Italy's Lake Como, Melbourne Hall in Derbyshire, and private gardens such as Biltmore and Dumbarton Oaks. *Imagining Eden* includes an eloquent introductory essay in which the landscape historian Denis Cosgrove explores how the concept of the locus amoenus relates to Gomes's work, and the photographs are accompanied by an evocative selection of quotes by the various settings' designers and by inspired observers. The book concludes with an extensive interview in which Gomes discusses how he balances craft and inspiration, the role of research in preparing a shoot, his preference for black-and-white over color ("I was completely, and immediately, enamored with the silver image"), and a sense of discovery as a chief motivation in all his work.
