The principal step in making tempeh is the fermentation of soybeans which undergo inoculation with Rhizopus spp. molds, a type of filamentous fungus most widely used for the production of tempeh. A fermentation starter containing the spores of fungus Rhizopus oligosporus or Rhizopus oryzae is mixed in.

#### Tempeh - Wikipedia

2.6. Tempeh Production. Tempehs were prepared following the methodology used by Starzynska-Janiszewska et al. . Two hundred grams of beans were cleaned in running water, submerged in 1000 mL of sterilized water at room temperature for hydration/maceration with the addition of 20 mL of commercial alcohol vinegar containing acetic acid (5%) for 20 h.

two scales in tropical Third World countries.

### Tempeh books

Tempeh, or tempe in some literature, is made by fermenting dehulled and cooked soybeans with mold, *Rhizopus* sp. Freshly prepared tempeh is a cake-like product, covered and penetrated completely with white mycelium, and has a clean, yeasty odor. When sliced and deep-fat fried, it has a nutty flavor, pleasant aroma, and crunchy texture, serving as a main dish or meat substitute.

### Tempeh - an overview | ScienceDirect Topics

A production incubator/pasteurizer for a larger facility might consist of two waterbath units (one above the other) using a total of 28 trays and producing 70 kg of tempeh every 24 h. Because stainless steel trays are used, the product can easily be premarinated with different flavors before being packaged and frozen.

### Tempeh Production A Craft And Technical Manual

I have been making my own tempeh successfully for 3 years now, from the knowledge I got from various blogs etc. But this book hasn't given me enough information to feel confident to open a commercial tempeh production with the equipment available in Europe in 2014. Too many pages are filled with the way tempeh is made in Indonesia etc.
