The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood’s blockbuster movie which was nominated for six academy awards, including best picture. From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him “The Legend”; meanwhile, the enemy feared him so much they named him al-Shaitan (“the devil”) and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle’s masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

A technical outline of the history of the sniper rifle, from its introduction in warfare during the Napoleonic wars, through the US Civil War to its current apogee as the most frequently used combat rifle in Iraq and Afghanistan. This book details the development of ammunition, different weapons types including single shot, magazine loading and semi-automatic, as well as the introduction and use of optical sights. Martin Pegler, a leading expert on the history of sniping and former Senior Curator of Firearms at the Royal Armouries Leeds, also details the current advances in technology, such as laser range-finding sights and night vision devices. Using first-hand accounts, the book brings the dangerous world of the sniper to life revealing their training and concealment techniques as well as their mastering of their weapon of choice.

The years since 9/11 have seen major changes in the way snipers are employed on the modern battlefield, alongside an incredibly rapid evolution in their weapons, equipment and training. This book covers the 14 years of near-constant warfare since the dawn of the 21st century, documenting where, when and how snipers have been deployed; their rifles, optics and their ancillary equipment such as laser range finders; their training and tactics and accounts of real-life operations involving sniper teams. The wars in Iraq and Afghanistan have reaffirmed the importance of snipers in both conventional and unconventional warfare, and this new study covers these developments in depth, as well as looking at the role of the sniper in police and counterterrorism environments.

Noted weapons expert Duncan Long describes the .22 LR, single-shot, bolt-action, semiautomatic and large-caliber rifles that can be used for sniping purposes, including the U.S. M21, Ruger Mini-14, AUG and HK-94SG1. These and other models are evaluated on the basis of their features, accuracy, reliability and handiness in the field. The author also looks at the best scopes, ammunition and accessories.

It takes a tough mindset to be a successful sniper, to be able to dig in for days on your own as you wait for your target, to stay calm on a battlefield when you yourself have become the target the enemy most want to take out. Craig Harrison has what it takes and in November 2009 in Afghanistan, under intense pressure, he saved the lives of his comrades with the longest confirmed sniper kill - 2,475 meters. In this unflinching autobiography, Craig catapults us into the heat of the action as he describes his active service in the Balkans, Iraq and Afghanistan, and gives heart-stopping accounts of his sniper ops as he fought for his life on the rooftops of Basra and the barren hills of Helmand province. Craig was blown up by an IED in Afghanistan and left battling severe PTSD. After his identity was revealed in the press he also had to cope with al Qaeda threats against him and his family. For Craig, the price of heroism has been devastatingly high. Powerful and compelling, The Longest Kill is a must-read for fans of military memoirs.

The twenty-first-century sniper is a mature, intelligent shooter who leverages technology to his deadly advantage. He has spent thousands of hours honing his skills. He is a master of concealment in all environments, from the mountains of Afghanistan to the crowded streets of Iraq. He is trained in science and left alone to create the unique art of the kill. To the sniper, the battlefield is like a painter’s blank canvas. It is his job to simultaneously utilize tools, training, and creativity to deliver devastating psychological impact upon the battlefield. And it is he alone who is left with the intimacy of the kill. A complete practical guide for any modern sniper, former Navy SEAL and military sniper Brandon Webb reveals the tips and basic training necessary to become an efficient marksman. Webb is an international authority on sniping, and after serving multiple missions in Iraq and Afghanistan, he ran the Navy SEAL sniper course, which is arguably the best sniper qualification course in the world. Including details on advanced sniper training for maritime, helicopter, and urban sniper operations, The 21st Century Sniper also touches on the latest research, development, testing, and evaluation of sniper weapons systems and optics. From trajectories and wind speed to camouflage and best vantage points and targets, Webb covers everything an expert sniper needs to know. This book is suitable for gun enthusiasts, outdoorsmen, the beginning sniper, and those with military backgrounds.

The sniper is a battlefield threat second to none. Mastering the art of marksmanship is critical but is only part of what makes a Navy SEAL sniper. Snipers must be able to apply the craft in an urban environment or alone on a hostile mountain top with equal effectiveness. Today’s sniper must not just leverage technological advances but also have the foreknowledge to select the best rifle and gear for the mission. Increasingly, he must have the mental toughness to adapt to a constantly changing environment, gather intelligence, and truly act as a force multiplier. In this comprehensive look through the eyes of former Navy SEAL sniper instructor Brandon Webb and fellow Navy SEAL snipers Chris Kyle and Glen Doherty, the authors reveal not just the fundamentals of marksmanship but also the science of shooting, stalking, and camouflage and how technological advances have changed the training and increased the effectiveness of the modern sniper. Including maritime, helicopter, and urban sniper operations, this updated edition also goes into detail on the latest research, development, testing, and evaluation of weapons and optics. From the basics like compensating for wind and bullet drop, to camouflage and placing yourself or your team in the best position to take a photo or pull a trigger, Webb and Doherty cover the critical elements that comprise the twenty-first century sniper.

The Soviet Union had developed a significant sniping force by 1939, but the extraordinary skill and cunning displayed by Finnish snipers during the Winter War forced the Soviets to innovate. On the other side, German sniping suffered from a lack of standardization of weapons and a lack of marksmen deployed at the start of the Great Patriotic War (1941–45). There were few heroes in the conflict, but on both sides, the snipers were idolized – especially on the Soviet side, gaining almost mythical status. As well as traditional bolt-action weapons, both sides used several types of semi-automatic rifle, such as the SVT-38 and the Gew 41. Offering greater firepower at the expense of long-range accuracy, such weapons would be profoundly influential in the postwar world. Fully illustrated, this absorbing study investigates the development of sniping weapons and techniques on World War II’s Eastern Front.

The Barrett M82A1 and its derivatives are among the most successful sniping rifles ever manufactured. Now entering its fourth decade of service, the short-recoil, semi-automatic system is capable of firing a devastating, 50-caliber round with lethal accuracy over distances of more than 2km. Unconfirmed reports from Afghanistan in 2012 accredited the Barrett with one of history’s longest ever kills at 2,815m. This is the technical history of a rifle initially developed as a sporting firearm, but which evolved into a long-range sniping rifle and a formidable military anti-materiel tool, designed to neutralize everything from enemy vehicles to parked aircraft. Adopted by snipers across the world, the Barrett rifles have seen active service in Operation Desert Storm, Iraq, and Afghanistan and have become an important addition to police, armed services, and Special Forces units alike.

The remarkable story of the Finnish marksman nicknamed “White Death” by the Red Army for his record number of confirmed kills. Simo Häyhä is the most famous sniper in the world. During the Winter War fought between Russia and Finland from 1939 to 1940, he had 542 confirmed kills with iron sights, a record that still stands today. A man of action who spoke very little, Simo Häyhä was hugely respected by his men and his superiors and given many difficult missions, including taking out specific targets. Able to move silently and swiftly through the landscape, melting into the snowbound surroundings in his white camouflage fatigues, his aim was deadly and his quarry rarely escaped. The Russians learned of his reputation as a marksman and tried several times to kill him by indirect fire. He was promoted from corporal to second lieutenant, and he was awarded the Cross of Kollaa. For sniping, Simo Häyhä only ever used his own M/28-30 rifle. Eventually, his luck ran out, and Simo received a serious head wound on March 6,1940, though he subsequently recovered. The White Sniper fully explores Simo Häyhä’s life, his exploits in the Winter War, the secrets behind his success, including character and technique, and also includes a detailed look at his rifle itself. There are appendices on the basics of shooting, the impact of fire on the battlefield, battles on the Kollaa Front during the Winter War, and a list of ranked snipers of the world. “No matter how many books on sniping you have read, this must be added to your list if you are serious about shooting.” —GunMart
