of all, it ' s important to clarify that psycholinguistics draw from two specific disciplines: psychology and linguistics. The first studies human thoughts, emotions, and behavior and the second studies language and its manifestations. Both of these fields come together to study the human language.

Psycholinguistics or psychology of language is the study of the interrelation between linguistic factors and psychological aspects. The discipline is mainly concerned with the mechanisms by which language is processed and represented in the mind and brain; that is, the psychological and neurobiological factors that enable humans to acquire, use,
