### Sociology of Education - The Sociology Teacher

Some of the most prominent sociologists working in education today have collaborated to address a wide range of empirical and theoretical issues. Adopting an international perspective, this book foregrounds cutting-edge research that highlights both the diversity and complexity of understanding education in society.

This collection brings together many of the world ' s leading sociologists of education to explore and address key issues and concerns within the discipline. The thirty-seven newly commissioned chapters draw upon theory and research to provide new accounts of contemporary educational processes, global trends, and changing and enduring forms of social conflict and social inequality. The research, conducted by leading international scholars in the field, indicates that two complexly interrelated agendas are discernible in the heat and noise of educational change over the past twenty-five years. The first rests on a clear articulation by the state of its requirements of education. The second promotes at least the appearance of greater autonomy on the part of educational institutions in the delivery of those requirements. The Routledge International Handbook of the Sociology of Education examines the ways in which the sociology of education has responded to these two political agendas, addressing a range of issues which cover three key areas: perspectives and theories social processes and practices inequalities and resistances. The book strongly communicates the vibrancy and diversity of the sociology of education and the nature of ' sociological work ' in this field. It will be a primary resource for teachers, as well as a title of major interest to practising sociologists of education.

This handbook unifies access and opportunity, two key concepts of sociology of education, throughout its 25 chapters. It explores today ' s populations rarely noticed, such as undocumented students, first generation college students, and LGBTQs; and emphasizing the intersectionality of gender, race, ethnicity and social class. Sociologists often center their work on the sources and consequences of inequality. This handbook, while reviewing many of these explanations, takes a different approach, concentrating instead on what needs to be accomplished to reduce inequality. A special section is devoted to new methodological work for studying social systems, including network analyses and school and teacher effects. Additionally, the book explores the changing landscape of higher education institutions, their respective populations, and how labor market opportunities are enhanced or impeded by differing postsecondary education pathways. Written by leading sociologists and rising stars in the field, each of the chapters is embedded in theory, but contemporary and futuristic in its implications. This Handbook serves as a blueprint for identifying new work for sociologists of education and other scholars and policymakers trying to understand many of the problems of inequality in education and what is needed to address them.

Scholarly analysis in the sociology of education has burgeoned in recent decades. Frontiers in Sociology of Education aims to provide a roadmap for sociologists and other social scientists as they set bold new directions for future research on schools. In Part 1 of this forward-looking volume, the authors present cutting-edge research to set new guidelines for the sociological analysis of schools. In Part 2, notable social scientists, historians, administrators and educators provide a wide-ranging array of perspectives on contemporary education to insure that scholars make creative and broadly informed contributions to the sociological analysis of schools. The contributors to this volume examine events currently influencing education including: globalization, expansion of educational access, the changing significance of religion, new family structures, and curriculum reform. Frontiers in Sociology of Education offers an innovative collection of research and ideas aimed at inspiring new analyses of schools better linked to changing societal conditions.

The Structure of Schooling: Readings in the Sociology of Education by Richard Arum, Irene Beattie, and Karly Ford exposes students to examples of sociological research on schools, with a focus on the school as community. Now in its Third Edition, this engaging reader has broadened its scope even more, presenting additional readings in particular related to the sociology of higher education. The book draws from classic and contemporary scholarship to examine current issues and diverse theoretical approaches to studying the effects of schooling on individuals and society. In addition to covering traditional areas such as stratification and racial inequality, the book also veers off the beaten path, including readings on such contemporary topics as bullying, school shootings, school choice, and teen social media use.
