Metal Pipe & Tube - Metal Tubing | metals4U

Interestingly, while the stated and measured OD’s of tubing are almost exact most of the time, copper tubing generally has a measured OD that is 1/8” larger than stated OD. As such, maybe it should be called copper pipe. However, stainless steel, aluminum, and steel tubing all have measured and stated OD’s that are exact or very close. Pipe

Tube vs Pipe - The Differences Explained in Plain English ...
