How to remove
Active Directory in
Windows Server

Official
Academic
Course Series

Active Directory is
a directory service
developed by
Microsoft for
Windows domain
networks. It is

File Type PDF Windows Server

included in most Windows Server operating systems as a set of processes and services. Initially, Active Directory was only in charge of centralized domain management. However, Active Directory became an umbrella title

File Type PDF Windows Server

for a broad range of directory-based identity-related services. A server running Active Directory Domain Service role is called a domain controller. It authenticates and authorizes all
